

Galderma Names Alisa Lask to Oversee Aesthetic & Corrective Business Unit

Fort Worth, TX – (September 7, 2017) – Galderma, based in Fort Worth, is the medical solutions business of Nestlé Skin Health. Galderma has appointed **Alisa Lask** as the company's new Vice President and General Manager of the Aesthetic & Corrective Business Unit in the United States, effective September 1, 2017. Alisa was previously Vice President of Marketing of the same business unit.

In her new role, Alisa will manage Galderma's broad portfolio of treatments – including *Restylane*[®] Refyne, *Restylane*[®] Defyne, *Restylane*[®] Silk, *Restylane*[®] Lyft with Lidocaine, *Restylane*[®] - L and Sculptra[®] Aesthetic – and continue to build on the portfolio's two decades of leadership in aesthetic medicine. In the U.S., Galderma most recently launched *Restylane*[®] Refyne and *Restylane*[®] Defyne, two FDA-approved, next-generation flexible HA dermal fillers that continue to deliver on the franchise's mission to be the leader in natural expression.¹

"Since joining Galderma in 2015, Alisa has consistently demonstrated her ability to direct strategy, interpret market insights and lead teams," said Miles Harrison, President & General Manager, Galderma North America. "She's a visionary executive with strong business acumen and passion for the customer. The North American Leadership Team and I are delighted for her to take this critical role for the Aesthetic & Corrective business."

"I am confident with Galderma's rich pipeline we will continue to bring solutions to the marketplace that transform category expectations, and I'm honored to lead a business unit poised to deliver a new chapter of aesthetic innovation," said Alisa.

Alisa has a long history in medical device and aesthetic industries, including her time at Allergan in global strategic marketing for facial aesthetics where she focused on new product planning in aesthetic innovation. Prior to that, she was Vice President of global strategic marketing at Zimmer Biomet, the global leader of hip and knee implants. Additionally, Alisa spent 11 years at Eli Lilly specializing in marketing for women's health and neuroscience. Alisa received an MBA from

Important Safety Information

Approved Uses:

Restylane® *Refyne* is for mid-to-deep injection into the facial tissue for the correction of moderate to severe facial wrinkles and folds, such as nasolabial folds, in patients over the age of 21.

Restylane® *Defyne* is indicated for injection into the mid-to-deep dermis for correction of moderate to severe, deep facial wrinkles and folds, such as nasolabial folds, in patients over the age of 21.

Contraindications:

Restylane® *Refyne* and *Restylane*® *Defyne* contain traces of gram-positive bacterial protein and

are contraindicated for patients with allergies to such material or for patients with severe allergies that have required in-hospital treatment. They should not be used by patients with bleeding disorders, with hypersensitivity to amide-type local anesthetics, such as lidocaine, or by women who are pregnant or breastfeeding.

Possible Side Effects:

The most commonly observed side effects include swelling, redness, pain, bruising, tenderness, headache, lump formation, and itching at the injection site. Use at the site of skin sores, pimples, rashes, hives, cysts, or infection should be postponed until healing is complete.

These products should not be injected into the blood vessels as they may cause vascular occlusion, infarction, or embolic phenomena. Use with caution in patients recently treated with anticoagulant or platelet inhibitors to avoid bleeding and bruising.

As with all skin injection procedures, there is a risk of infection.

To report a side effect with any of the *Restylane*[®] products, please call Galderma Laboratories, L.P at 1-855-425-8722.

Restylane[®] *Refyne* and *Restylane*[®] *Defyne* are available only through a licensed practitioner. Complete Instructions for Use are available at www.RestylaneUSA.com.
